

**IT'S TIME FOR SOMETHING DIFFERENT  
CHARGE YOUR BODY WITH EXTRA ENERGY.**

**DTX8** supplement is driven by our **DTXCLUB** technology, utilizing best in class bioavailability enhancers and intelligent dosing delivery to help maximize every single drop you take.

One of the many highlights of **DTX8** is that it suits anyone's lifestyle, from the most active-athletic individual to the most sedentary person you may know. Its ingredients provide a perfect synergy to your body which gives you a natural and effective energy boost, minus the annoying side effects of coffee or other energy beverages.

**DTX8** was designed to increase your energy and give you a whole new level of vitality. **DTX8** is the go-to supplement to increase energy levels while supplying your body with caffeine and taurine, both substances aimed to help you feel more energetic and stay focused.

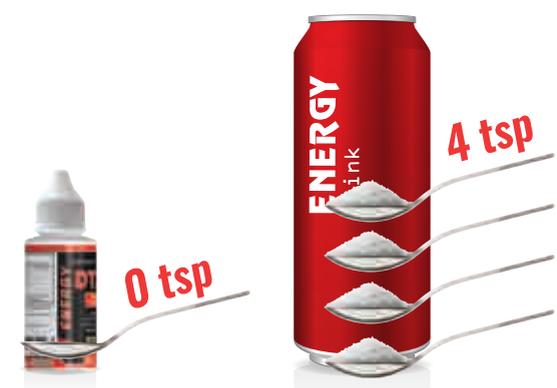

Energy is not a nutrient but is required in the body for metabolic processes, physiological functions, muscular activity, heat production, growth and synthesis of new tissues.

### HOW DOES DTX8 COMPARE TO OTHER ENERGY-BOOSTING ALTERNATIVES?

**DTX8** gives you all of the effects and way more than any other energy drinks, and the best part is you don't have to worry about big loads of sugar or artificial substances.

### SUGAR OVERLOAD

## TAKE YOUR ROUTINE TO THE NEXT LEVEL

**DTX8** offers a great variety of ingredients which have been shown to support a healthy lifestyle. All of the main substances in its formula, maximize the results you can have by taking it on a daily basis.

## CAFFEINE

Peak your cognitive performance in a natural and efficient way with **DTX8**.

Mental toughness and clarity of mind are the difference between reaching your goals and redefining them. Several studies suggest that caffeine can improve your memory, decrease fatigue, improve your mental functioning, among other functions.

**DTX8** provides to your body 50 mg of pure caffeine, which can help you prevent Parkinson's or Alzheimer's disease, since there is substantial evidence proving that caffeine is protective against neurodegenerative diseases like the ones mentioned.

## TAURINE

Taurine promotes cardiovascular health, insulin sensitivity, electrolyte balance, hearing function, and immune modulation. In animal research, taurine protected against heart failure, reducing mortality by nearly 80%.

Its benefits are so broad and extensive that scientists have described taurine as "a wonder molecule."

Trained athletes who supplement with taurine experience a better exercise performance. Working muscles generate oxidant stress and damage DNA, leading to the potential for muscle damage and poorer performance.

Taurine protects muscles from such damage, so muscle works more safely.enerative diseases like the ones mentionef

## PROPRIETARY BLEND

Most energy products tend to hide their proprietary blend because of sketchy procedures or low quality ingredients. With **DTX8**, we don't. All of the ingredients are carefully selected in order to bring you a more effective formula. The main ingredients you can find in DTX8 are the following:

### 1 Oxygen

Eliminate toxins

- Increases endurance during workouts
- Boost energy levels.

### 2 L-Carnitine

An amino acid that is synthesized in the liver and kidneys concentrated in the body's most metabolically active organs: the brain, heart, and muscles.

### 3 Amino acids

The human body uses amino acids to make proteins to help the body:

- Break down food
- Repair body tissue

### 4 Minerals

Catalyst for all the vitamins and other nutrients the body uses for developing and maintaining good health.

### 5 Electrolytes

Regulates our nerve and muscle functions, body hydration, blood pH, blood pressure and the rebuilding of damaged tissue.

### 6 Hydrogen

Proper oxygenation in the body.

- Calms the mind and stabilizes the nervous system.

### 7 Silica

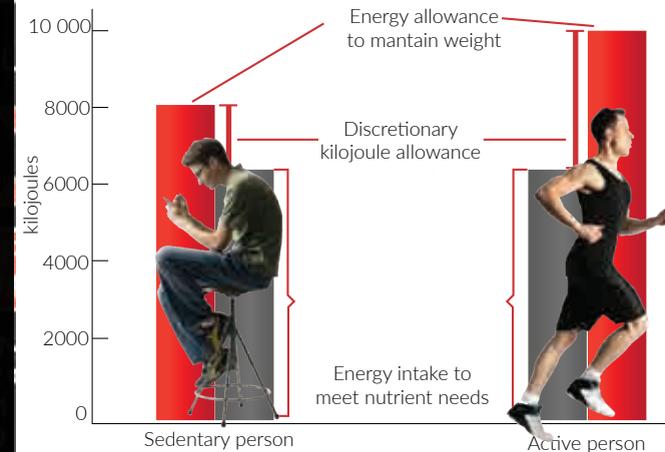

It may support bone health and the creation and maintenance of connective tissue.

## HOW MUCH ENERGY DO YOU REALLY NEED?

Kilojoules (food energy) are important for providing energy for your daily activities and body function. That's why you should balance the energy you consume through foods with the energy you need during the day. The more active you are the more kilojoules of food energy you need. If you are less active, your body needs fewer kilojoules to get you through the day.

The percent Daily Intake values used in DIG are based on an average adult diet of 8,700 kilojoules (kJ). However, many people will require different amounts of food energy at various stages of their lives and as their activity level varies. For instance, an active teenager, requires more food energy than a sedentary person.

Are you on the active or sedentary side?

## HOW TO TAKE DTX8?

Take DTX8 twice a day, morning and early afternoon. Take 10 drops per serving with water, 15 minutes before you workout.
