

THE HUMAN BODY IS COMPOSED OF 30% COLLAGEN!

Collagen is the vital building block of our bodies including skin, hair, nails, bones, and joints. Our bodies cannot synthesize enough collagen on their own and our diets today contain a minimal amount of collagen. Think of collagen as the glue that holds us together. DTXCLUB has created a one of a kind powdered hydrolyzed collagen delivering numerous benefits and a fantastic flavor you'll enjoy.

Hydrolyzed simply means that we use an all natural enzyme process to break down the very long collagen chain, into shorter chain Collagen Peptides. Why do this? Because shorter chain collagen peptides, with a lower molecular weight than gelatin or standard collagen is much easier for the body to absorb.

As collagen plays such a crucial role in several bodily functions, giving your body a low molecular weight, bioavailable and highly absorbable collagen will help improve your overall health.

Found in our skin, bone, tendons, ligaments, muscles and cartilage, it's the main component of all our connective tissue, giving our skin its elasticity and literally helping to hold the body together. By our mid-20s, however, collagen production in our bodies is already in decline, and it decreases further as we continue to age. The result is an acceleration of age-related markers such as wrinkles, sagging skin, painful joints, osteoporosis, inflammation, and weak hair and teeth.

Here are some of the potential health benefits of collagen you'll enjoy by taking Collagen5:

- Improve skin health
- Younger and firmer skin
- Joint health
- Improvement of gut function and digestion
- Prevention of excess inflammation
- Build and restore muscle
- Healthy metabolism
- Appetite under control
- Healthy brain function
- Deeper sleep

REVERSE THE AGING DECLINE WITH COLLAGEN5!

DTXCLUB has created Collagen5, a natural dietary supplement that provides the foundation for strong healthy tissues and skin. In other words, Collagen5 works as a building block for all the body's system.

Many foods promote the production of collagen but there are few actual collagen sources in the food we tend to eat. Give the best to your body with Collagen5, you deserve it!

SUPPLEMENT FACTS

Serving Size: 1TBS (6.5 g) Servings Per Container: 30

| | | |
|---------------------------|---------|------|
| Sodium | 0 mg | 0% |
| Total Carbohydrate | 0 g | 0% |
| Sugars | 0 g | |
| Protein | 6 g | |
| <hr/> | | |
| Vitamin C (Ascorbic acid) | 60 mg | 100% |
| <hr/> | | |
| Hydrolyzed Collagen | 1500 mg | ** |

* % Daily value not established the percent daily values are based on a 2000 calorie diet

Ingredients: Collagen (hydrolyzed), Malic acid, Vitamin C (ascorbic acid), Resveratrol, Acai (Euterpe olerace), Pomegranate (Punica granatum L.), Maltodextrine, Stevia (Stevia rebaudiana) and Natural orange flavor.

This product is not intended to diagnose, treat, cure or prevent any disease. These statements have not been evaluated by the FDA (Food and Drug Administration)

DTXCLUB COLLAGEN 5

LOOK GREAT AND STOP THE AGING PROCESS

- Youthful skin
- Strong hair and nails
- Joint, bone and gut health

REBUILD, RECOVER AND PERFORM TO THE BEST OF YOUR BODY'S NATURAL ABILITY.

Collagen is often referred to as a “complex protein,” which is not surprising considering it contains different amino acids.

Intact collagen has a tightly bound protein structure and is hard to digest, but when broken down to its hydrolyzed (peptide) form it is easily absorbed in the intestinal tract and provides essential and non-essential amino acids. Hydrolyzed collagen may provide support for the extracellular matrix by stimulating anabolic processes in skin tissue more than amino acids alone.

Collagen5 is formulated with high quality ingredients that can help slow down the appearance of aging from the inside out.

By including Collagen5 in your daily diet, you can help improve your circulation. The blend of collagen, resveratrol, acai, pomegranate fruit and vitamin C help to purify the entire circulatory system, making this a great combination that helps fight and prevent varicose veins and cardiovascular diseases.

VITAMIN C

Helps the body to produce the necessary amounts of collagen for rapid wound healing and it contributes to the proper function of the immune system.

This water-soluble vitamin and powerful antioxidant, helps the body form and maintain connective tissue, including bones, blood vessels, and skin.

Vitamin C helps to repair and regenerate tissues, protect against heart disease, aid in the absorption of iron, prevent scurvy, and decrease total and LDL (“bad”) cholesterol and triglycerides

An appropriate intake of vitamin C may also lessen the duration and symptoms of a common cold, help delay or prevent cataracts, and support healthy immune function.

ACAI

Its main features include its high antioxidant power, as it is able to protect cells from attacks by free radicals that can damage different parts of our cells, such as the DNA.

Several studies have suggested that acai could help improve cholesterol levels by decreasing total and LDL cholesterol. It's possible that the anthocyanins in acai could be responsible for their positive impact on cholesterol levels, since studies have linked this plant compound to improvements in HDL and LDL cholesterol.

Acai berries are also known for providing the following elements:

- **Electrolytes**
- **Trace minerals**
- **Amino acids**
- **Essential fatty acids**
- **Fiber**
- **B vitamins**

POMEGRANATE

This fruit is fat free and cholesterol free. It highlights the contribution of potassium, citric acid and antioxidants. Potassium is essential for maintaining healthy blood pressure. Its antioxidants can help prevent atherosclerosis and heart disease.

Pomegranate is also known for other great benefits such as healing of stomach disorders, dental care, treatment of anemia and diabetes control.

RESVERATROL

This is an antioxidant that promotes longevity and defends our bodies from free radicals slowing the effects of aging. Resveratrol also has many anti-inflammatory and cardio-protective effects.

Because of its antioxidant properties, resveratrol could be a promising supplement for lowering blood pressure levels.

Resveratrol seems to influence cholesterol levels by reducing the effect of an enzyme that controls cholesterol production.

As an antioxidant, it also may decrease the oxidation of “bad” LDL cholesterol. LDL oxidation contributes to plaque buildup in artery walls

ADDITIONAL BENEFITS

- **Promotes the development of bones, muscles and protects joints.**
- **Can help burn fat, fight cellulite and sagging.**
- **Deeper sleep, lasting energy, early recovery from fatigue, relief from stress and anxiety.**
- **It can help supplement and increase the amino acid content of other sources of protein in your diet.**

HOW TO TAKE COLLAGENS

Mix 1 scoop of Collagen5 in 240ml of cold water and shake until it dissolves completely. It is recommended to add the collagen first and then water. We recommend to take Collagen5 in the mornings.
